Re: 131-13943
Third Administrative Amendment to
S 131-7500-00008

Dear Ms. Maenhout:

Vulcan Materials Company, Francesville Quarry, was issued a Source Specific Operating Agreement (S 131-7500-00008) on January 21, 1997, for a stationary crushed stone processing operation. On December 5, 2000, Vulcan Materials Company submitted a review request to determine permitting requirements for a construction project to add a screen and two conveyors to its existing operation. The screen equipment was inadvertently not included in the second amendment 131-13596. This third amendment is to correct that oversight.

The Source Specific Operating Agreement that was issued on January 21, 1997, provided for the crushed stone operation with an annual throughput of less than three million (3,000,000) tons per year consisting of no more than nine (9) crushers, seventeen (17) screens, and one (1) conveying operation with particulate matter emissions limited to one hundred (100) tons per year (Conditions 1, 2, and 3). The construction project as described by Vulcan Materials Company consists of adding a screen to the existing operation.

Based on the above information, no additional permitting approval is necessary for the described construction project. This determination is contingent upon the new conveyors being a part of the existing conveying operation, the annual throughput remaining below the three million (3,000,000) tons per year threshold, and that the particulate matter emissions for the entire crushed stone operation not exceed the one hundred (100) ton per year limit.

For your additional inquiries on instructions for performing the initial testing of the new equipment, please contact the Compliance Data Section, Office of Air Quality at the following address. A test protocol must be submitted no less than thirty-five (35) days prior to testing so it is important that you contact Compliance Data as soon as possible. The test protocol form was included with the second amendment.

Indiana Department of Environmental Management
